

## Dosing system series 464 for graphite-free and water-soluble lubricants

### Specification

compact system for the precise dosing of lubricants to supply your spray system

fully automatic dosing process

variable level control - variable volume

simple regulation of the mixing-proportion of 0.1% - 5% on the display

display of the consumed quantity (concentrate, water)

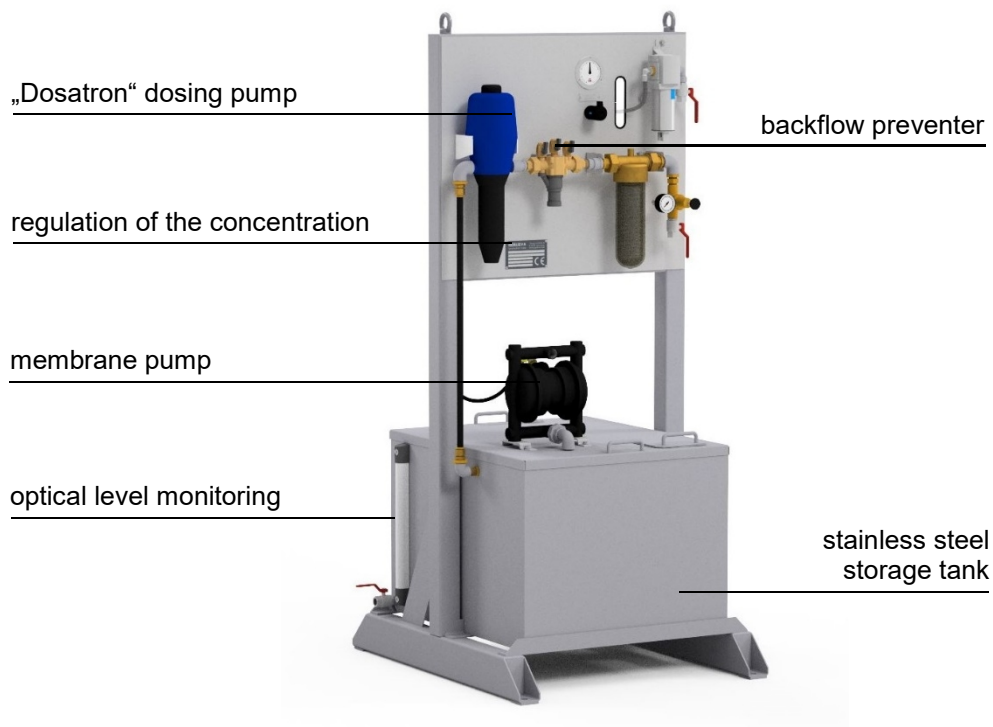

interface to our die spray system or the dcm

storage tanks are available in other sizes, too

optionally with rinsing function, fully automatic filtering for lubricant and flow capacity monitoring

**spray medium containers and dosing systems are available  
for graphite-based and graphite-free lubricants**

## Dosing system series 465 for graphite-free and water-soluble lubricants

### Specification

compact system for the precise dosing of lubricants to supply your spray system

fully automatic dosing process with „Dosatron“ dosing pump

simple and multi-stage regulation of the mixing-proportion

stainless steel storage tank 30 litres with optical level monitoring

**spray medium containers and dosing systems are available  
for graphite-based and graphite-free lubricants**
