

Custom designed sprayheads with diaphragm control

4-circuit custom designed sprayheads for crankshaft

for 2 spray medium
media 1: water-graphite
media 2: water

Custom designed sprayheads

For forging pieces with large batch sizes it is often cost-effective to use specially designed sprayheads.

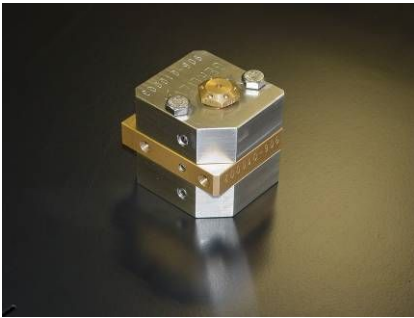

Optimal spraying results are reached by a sprayhead adapted on the forging form. We develop specified solutions for each part with an optimal efficiency, short cycle times and a minimum medium consumption.

4-circuit custom designed sprayheads
for steering knuckle

for 2 spray medium
media 1: water-graphite
media 2: water

2-circuit custom designed sprayhead
for 1 spraying media
